## Experiment – 1

**Question :** Create a Kanban Board to Visualize the Tasks.

- **Create Columns for To Do, In-Progress and Done.**
- **Add Atleast 5 Sample Tasks**
- **Move the Tasks across the Columns to Simulate the Workflow.**

**Link :** <https://saveetha-team-tcs.atlassian.net/jira/software/c/projects/KS/boards/2>

**1 . Login into your Jira Account and click the plus in the space in the side bar .**

**2 . Now choose the Kanban from the Space Templates .**

### 3. Click on use template.

## Kanban

Kanban (the Japanese word for "visual signal") is all about helping teams visualize their work, limit work currently in progress, and maximize efficiency. Use the Kanban template to increase planning flexibility, reduce bottlenecks and promote transparency throughout the development cycle.

### Track work using a simple board

Work items are represented visually on your kanban board, allowing teams to track the status of work at any time. The columns on your board represent each step in your team's workflow, from to-do to done.  
[Learn more about kanban boards](#)

### Use the board to limit work in progress

Set the maximum amount of work that can exist in each status with work in progress (WIP) limits. By limiting work in progress, you can improve team focus, and better identify inefficiencies and bottlenecks.

**Product**

 Jira

**Recommended for**

Teams that control work volume from a backlog

DevOps teams that want to connect work across their tools

**Work types**

-  Epic
-  Story
-  Bug
-  Task
-  Sub-task

**Workflow**

- To Do
- In Progress
- Done
